Master Data Configuration Guide

This document outlines the required master data items and their configuration requirements for the system. All master data entities have specific mandatory fields, validation rules, predefined types, and payload structures that must be followed during creation.

1. Accounts

Account Creation Requirements

- **Required Fields:**
  - Name (mandatory)
- **Entity Name:** accounts

Validation Rules

- Name field cannot be empty
- Special Rule: If user says "add contact Name" then email is mandatory (vice-versa)

Payload Structure for Accounts

If user is adding contact name then only we will add primary contact in the payload and contact name will be "first_name" and account name will be "name"

```json
{
  "name": "string",
  "phone_number": "number",
  "primary_contact": {
    "email": "nadira.nusrath+432w@ephanti.com",
    "first_name": "Kianne"
  }
}
```

Key Mappings:

- Name: "name"

2. Contacts

Contact Creation Requirements

- **Required Fields:**
  - Name (mandatory)

    - Email (mandatory)
- **Entity Name:** contacts

Validation Rules

- Name field cannot be empty
- Email field is mandatory and must be in valid email format

Payload Structure for Contacts

Phone number will store as "phone_number"

```json
{
  "first_name": "string",
  "email": "string",
  "phone_number": "number"
}
```

Key Mappings:

- Name: "first_name"
- Email: "email"

3. Employees

Employee Creation Requirements

- **Required Fields:**
    - Name (mandatory)
- **Entity Name:** employees

Validation Rules

- Name field cannot be empty

Payload Structure for Employees

```json
{
  "first_name": "string",
  "email": "string"
}
```

Key Mappings:

- Name: "first_name"
- Email: "email"

4. Organization

Organization Creation Requirements

- **Required Fields:**
  - Name (mandatory)
- **Entity Name:** organizations

Validation Rules

- Name field cannot be empty

Payload Structure for Organization

```json
{
  "name": "string"
}
```

Key Mappings:

- Name: "name"

Master Data Entity Mapping

API Endpoints/Entity Names

Master Data Type	Entity Name
Accounts	accounts
Contacts	contacts
Employees	employees
Organization	organizations

Search Filters

Accounts Search Filter

```json
```

```
{
  "offset": 0,
  "limit": 10,
  "skip": 0,
  "order": "last_modified_date desc",
  "where": {
    "or": [
      {
        "name": {
          "ilike": "%search_term%"
        }
      },
      {
        "primary_contact.email": {
          "ilike": "%search_term%"
        }
      },
      {
        "primary_contact.full_name": {
          "ilike": "%search_term%"
        }
      }
    ]
  }
}
```

Contact Search Filter

json

```
"where": {
 "or": [
  {
   "full_name": {
    "ilike": "%search_term%"
   }
  },
  {
   "email": {
    "ilike": "%search_term%"
   }
  },
  {
   "phone_number": {
    "ilike": "%search_term%"
   }
  }
 ]
}
```

Employee Search Filter

json

```
"where": {
 "or": [
  {
   "full_name": {
    "ilike": "%search_term%"
   }
  },
  {
   "email": {
    "ilike": "%search_term%"
   }
  }
 ]
}
```

Organization Search Filter

json

```
"where": {
  "or": [
    {
      "name": {
        "ilike": "%search_term%"
      }
    }
  ]
}
```
